# VANTAiO Enterprise TV Display

## Typical Challenges

- > Existing TVs in the company are not used optimally
- > Media breaks by using a standalone digital signage software
- > Content cannot be played differently on a day-time basis
- > No live content from key enterprise systems such as SAP
- > No real, overarching management of all existing screens
- > Missing displays in key locations. No awareness of communication!

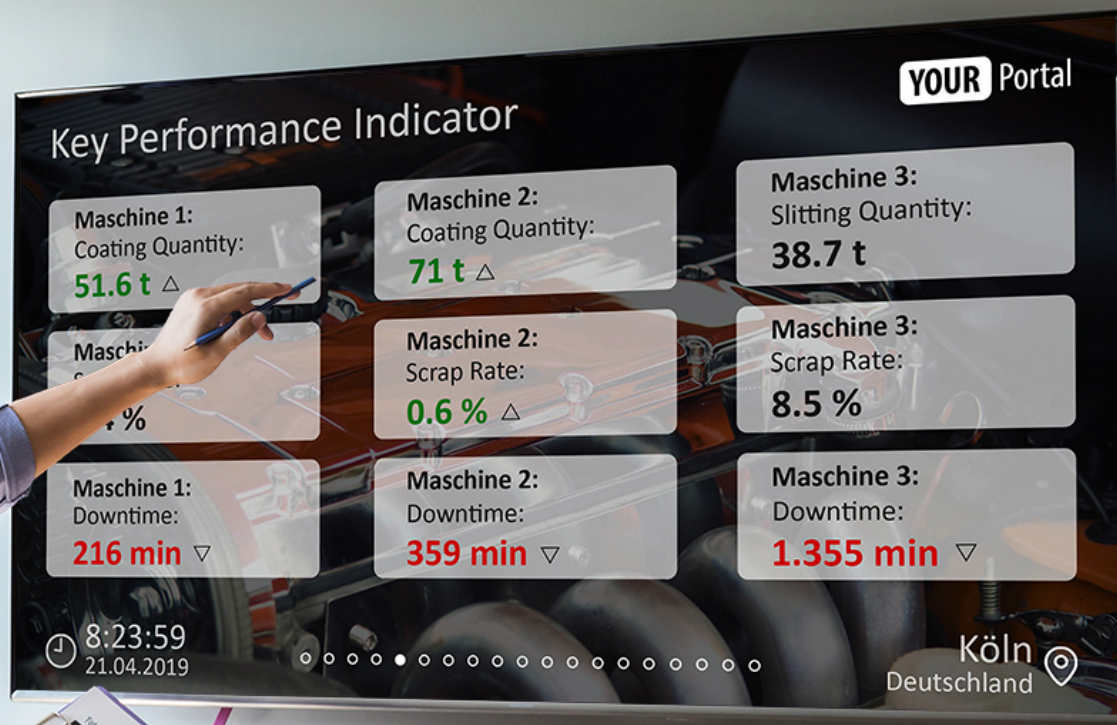

Sandra Neuer learns at 5 pm when she leaves the building that her preferred company parking space will be closed tomorrow and what alternative options are available to her.

Benjamin Frei informs himself at noon about current key figures and quality data of the machines, automatically transmitted from the production systems.

Leopold Graf and Helena Jakobs are waiting for the start of their meeting with the department head. During the waiting period, they discuss current key performance indicators.

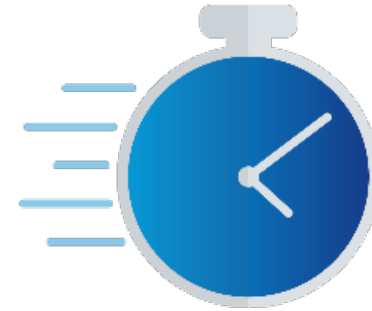

The marketing team schedules a follow-up appointment and, thanks to the VANTAiO TV display, keeps track of the times at all locations worldwide. At a glance, it is clear at what time the required contact persons are available.
